Cristhian A. Luna

Software Developer

About me

Web developer with two years of experience creating user interfaces, SPA's, web applications, and Restful APIs using JavaScript frameworks such as React, Vue, and Svelte. For various local businesses. During this trip, I learned some lessons that I believe will be very helpful to your organization. It would be great to work together.

Experience

March 2021 - until Now

FullStack Developer (MERN) | Freelance

- UI development with support for all browsers, and responsiveness for any device.
- Design, development and management of SQL and noSQL databases (PostgreSQL, MySQL and Node.js).
- Development, encryption of Restful API routes (endpoints) for the requests of client apps.

May 2020 - Sept 2020

FullStack Developer (MERN) | BESE

- Created the user journey for the subsequent management of navigation and content.
- Developed the user management functional components, such as login, registration, and password recovery.
- Participated in the development of the Restful API, and set the endpoints & server requests.

Goal: Capture of key metrics for decision-making and resource allocation has improved.

March 2019 - Feb 2020

Frontend Developer | Kninos

- Built an admin dashboard for the management of roles and user permissions
- Created a desktop application that syncs data from the server, and works at the same time as the browser version.
- Developed POS service, which included billing, inventory management, and an overview of income and expenses.
- Built a registry containing pet information to make it easier to track their vaccines, medications, and/or veterinary treatments.

Goal: Increased profits and clients per day, as well as customized email marketing support.

Education

2022

System Engineering (currently last level)

ULEAM, Computer Science Faculty
