Profile

Hello, I'm a **Systems Engineering student**, in my last year of college degree. I had been involved in development of web applications for above a year, besides 3 years in academic studies of **software development methodologies** and **software quality management**. I would like to contribute with my skills to your bussines, together with your team to be able to fill all the requirements of your clients, and overcome any upcoming challenge.

Experience

Remote Fronted Developer - Now
Currently I'm working as a freelance, where I build simple **web layout**, to dynamic web apps, **E-commerces**, even desing of **wireframes** and **User Jorney**.

BESE: UI Requirements Analysis & Development (2020 May - Sept)
I had the opportunity to assume different roles in the development stages until finally the built solution went into production. Being part of the establishment of requirements, collaborating in the user interfaces **(Sketch, Figma)**, participating in the development of the modules **(React/Redux, NodeJS, MySQL)** & database modelling.

**Kaninos -JavaScript,NodejJS,&React JS Developer (2019-2020)**
I participated as leader of a development team of 5 people, of a small software project for internal accounting management, and **POS Sales**, of a local veterinary health establishment. We use **Scrum methodology** for all stages of development and help in the creation of user manuals and software documentation. For this, we used technologies such as **ReactJS, Express, SASS, MongoDB, Microsoft Azure**. and **ElectronJS** for desktop version.

Education

Systems Engineering (currently last level) 2021
